

$$V = s^3$$

$$ax^2 + bx + c = 0$$

$$d = \sqrt{(x_2 - x_1)^2 + (y_2 - y_1)^2}$$

$$y = mx + b$$

WELCOME BACK!

With back-to-school right around the corner, we want you to succeed in all your classes.

Remember, NetTutor® tutoring is available to you 24 hours a day, every day of the year - including holidays! We're here to help you make this school year a successful one.

$$V = \frac{4}{3} \pi r^3$$
